

PROCEEDINGS of the XXIII International Symposium on

Lepton and Photon Interactions at High Energy

The major international focus of high energy physics in odd-numbered years is the International Symposium on Lepton and Photon Interactions at High Energy.

Aug. 13-18, 2007, Daegu, Korea

Editors: **Dongchul Son** (*Kyungpook National Univ.*)
 Sun Kun Oh (*Konkuk Univ.*)

This volume contains contributions to the XXIII International Symposium on Lepton and Photon Interactions at High Energy, held in Daegu, Korea. It gives up-to-date reviews of all aspects of particle physics, written by leading practitioners in the field. The review nature of all the articles makes this volume more accessible to students and researchers in other fields of physics. In addition to new experimental data and advances in theory, the future directions and prospects for the field are covered. It includes the LP07 Proceedings DVD of papers and live video recordings of the presentations and various activities during the conference.

Contents:

- Electroweak Physics and Beyond
- Proton Structure
- Searches for New Physics
- Low Energy e^+e^- and Charged Lepton Physics
- Flavour Physics
- Particle Spectroscopy
- Quantum Chromodynamics
- Dark Matter and High Energy Cosmic Particles
- Neutrino Physics
- Cosmology and Astrophysics

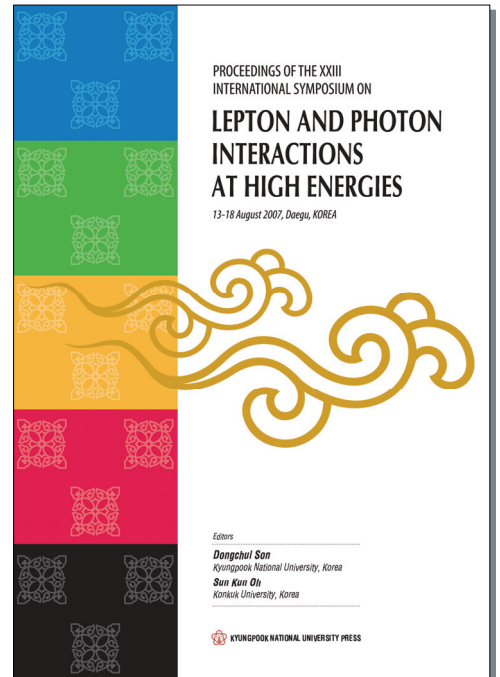

Readership: Researchers in High Energy Physics, Astrophysics, Nuclear Physics, and Accelerator Physics.
